Re: APS Construction

To Whom it May Concern,

I contracted with Jamie Accetta and APS Construction to build out my tenant improvements for two fitness franchises that I own. Each facility was approximately 1,350 square feet, and needed to be built out from scratch.

From the inception of both projects, Jamie was not only helpful, but instrumental in the planning of the layout and scope of work to be done. His expertise in his field made it very easy on me to determine what exactly I needed and why exactly I needed it.

His craftsmanship is impeccable, paying attention to every little detail ensuring that his end product was perfect. The subcontractors and employees that he uses are every bit as professional and talented as he is.

Jamie had a way of making the projects virtually effortless on my part, as he stayed on top of everything to be done and advised me along the way as to any necessary changes that had to be made. His pricing, professionalism, and ease to work with make him an incredible contractor.

Jamie was such a pleasure to work with, that I almost wish the project never ended. I would highly recommend APS to anyone looking for high quality, timely, and professional results.

Sincerely,

Brian Mahoney
